

Kannada font settings required to be implemented where system is installed with Internet Explorer 9 or Windows 7

Following settings are to be implemented to enter Kannada fields in web portal www.ekarmika.com where system is installed with Internet Explorer 9 or Windows 7.

As a first step, user has to click on “Start” button. Upon clicking this button, system will pop up window showing various types of links. Out of these links, user has to click on “Control Panel” as highlighted in Fig. 1.

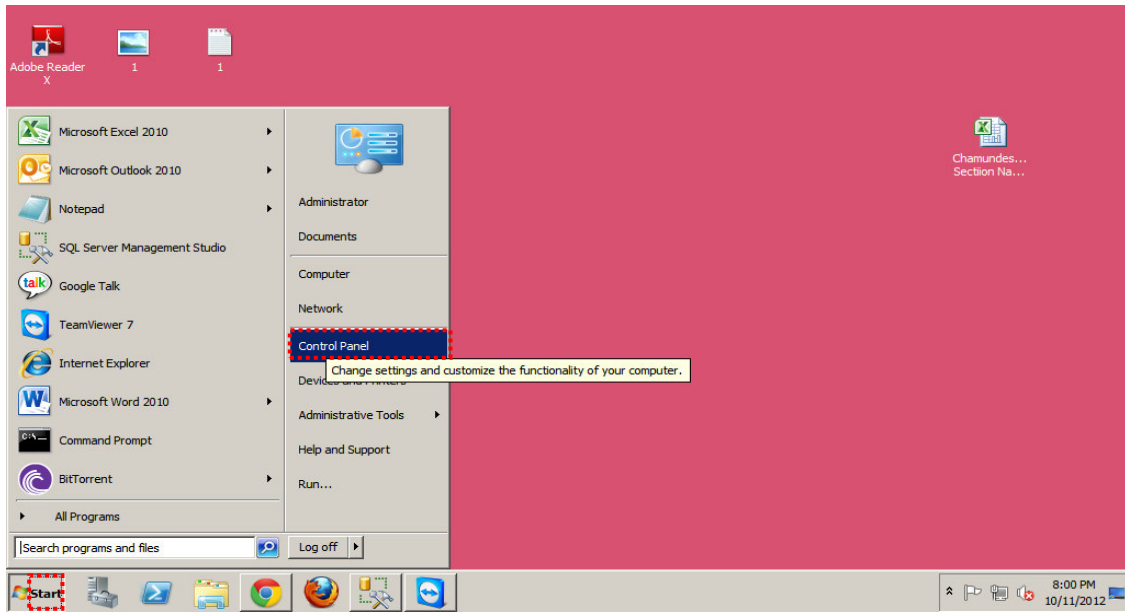

Fig. 1

By clicking “Control Panel” link, system will in turn open one more window containing number of sub links. In this window user has to click on “Clock, Language and Region” as highlighted in Fig. 2.

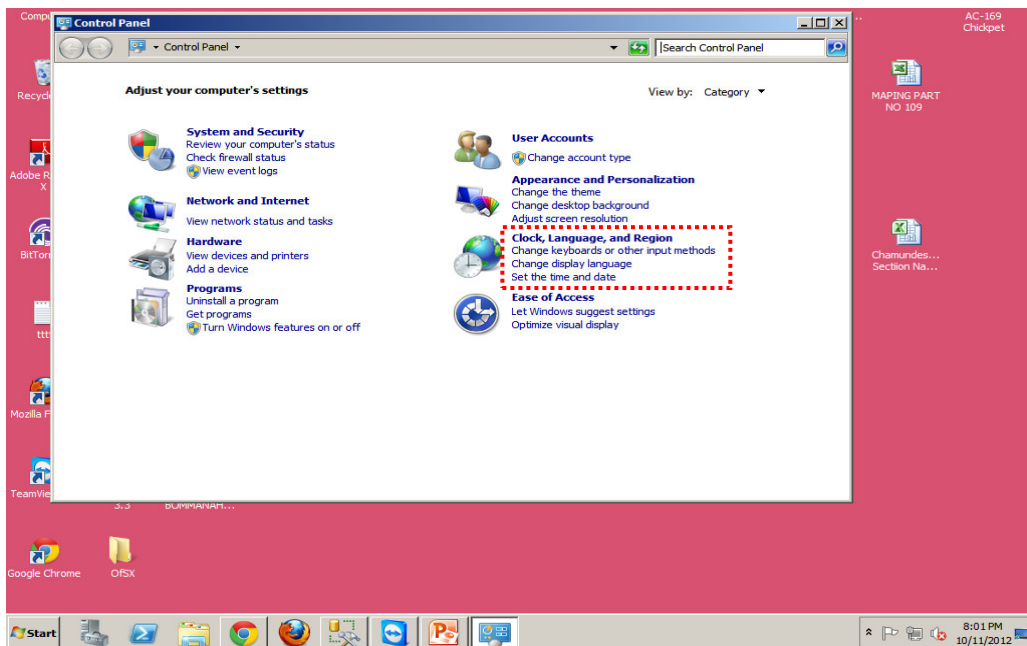

Fig. 2

Upon clicking this sub link, system will display content of this sub link as shown in Fig. 3. Then user has to click on “Region and Language” as highlighted.

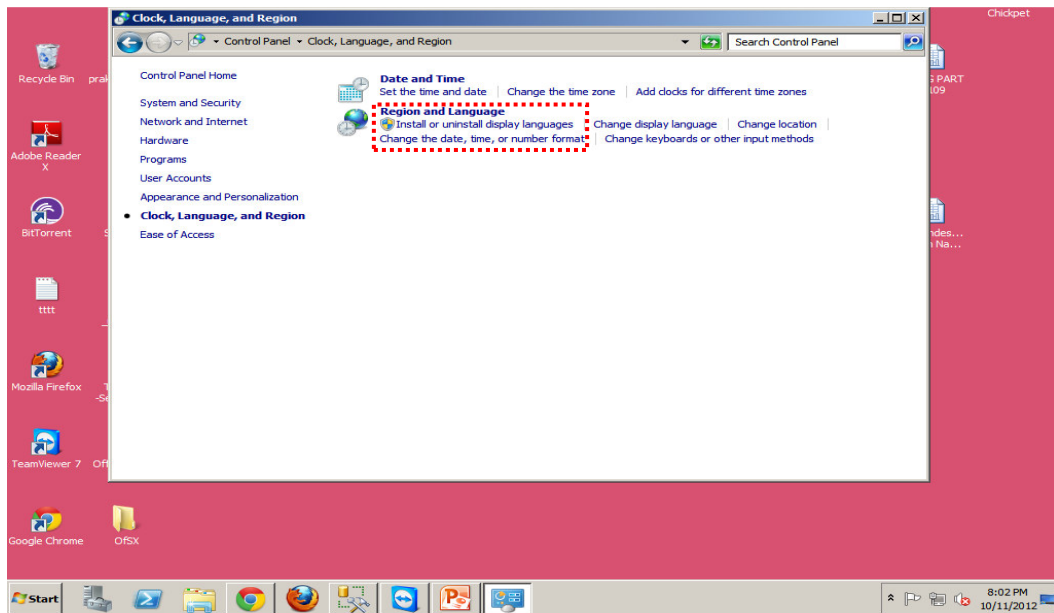

Fig. 3

By clicking this sub link system will pop up window containing various menus of Region and Language. Out of these menus, user has to click on “Keyboards and Languages” menu as highlighted in Fig. 4.

Upon clicking this menu, system will pop up an additional window containing two buttons namely Change Keyboards and Install/Uninstall Languages. Out of these two buttons, user has to click on “Change keyboards” as highlighted in Fig. 5.

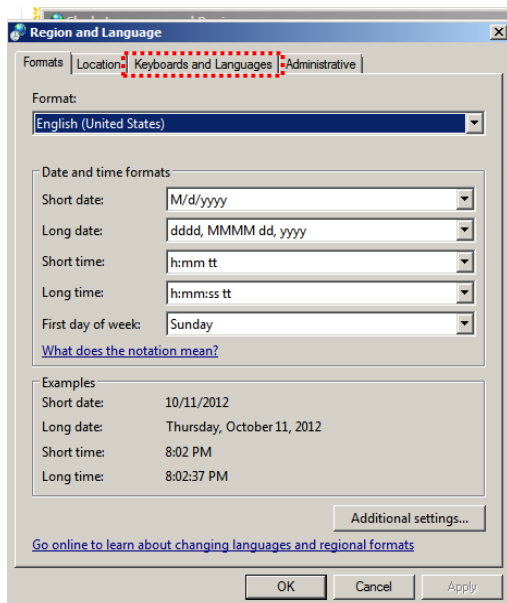

Fig. 4

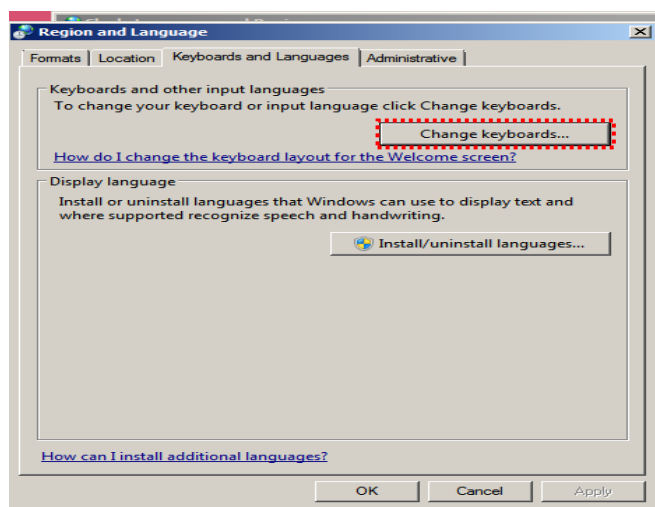

Fig. 5

By clicking this button, system will display one more window as shown in Fig. 6. In this window, user has to select “General” menu. After selecting this menu, user has to click on “Add” button as highlighted in Fig. 6.

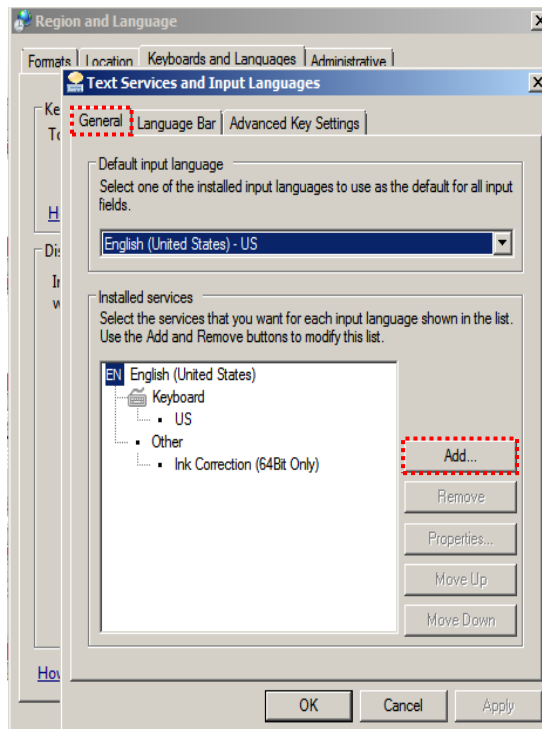

Fig. 6

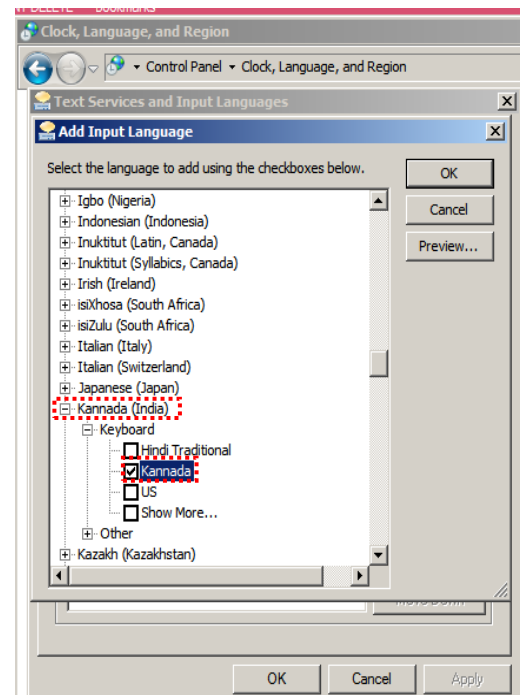

Fig. 7

By clicking “Add” button, system will open window containing various languages with + link placed against each language to show more contents. Out of these languages, user has to click on + link placed against “Kannada (India)” as highlighted in Fig. 7. By clicking on + link, “Kannada” will be displayed with square button to activate. Then user has to activate Kannada by clicking square button as highlighted in Fig. 7.

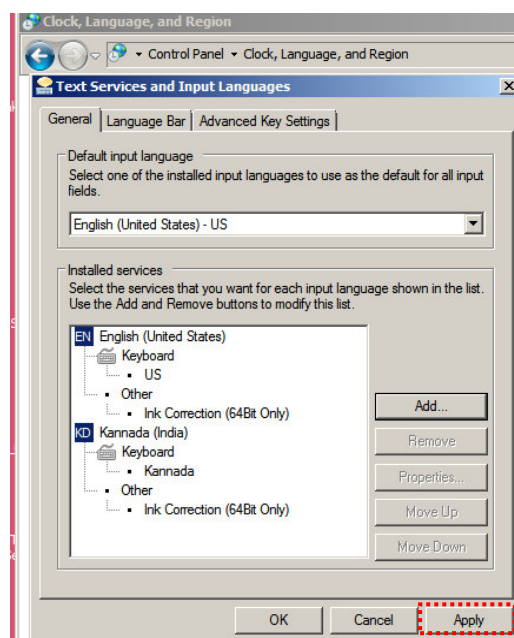

Fig. 8

After activating Kannada, user has to click on “Apply” button as highlighted in Fig. 8. Prior to implementing this setting, user has to download and install free version of Nudi software in to the particular system. Then to implement above mentioned setting, user has to Restart the computer.

After successful restart, user has to open e-karmika web portal and initiate the task of filling the registration form. While filling details in Kannada language, user has to select Nudi direct from list of programs as highlighted in Fig. 9.

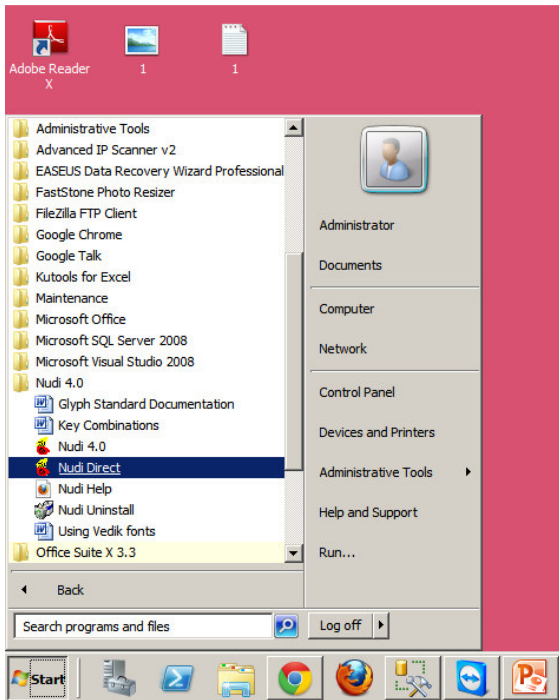

Fig. 9

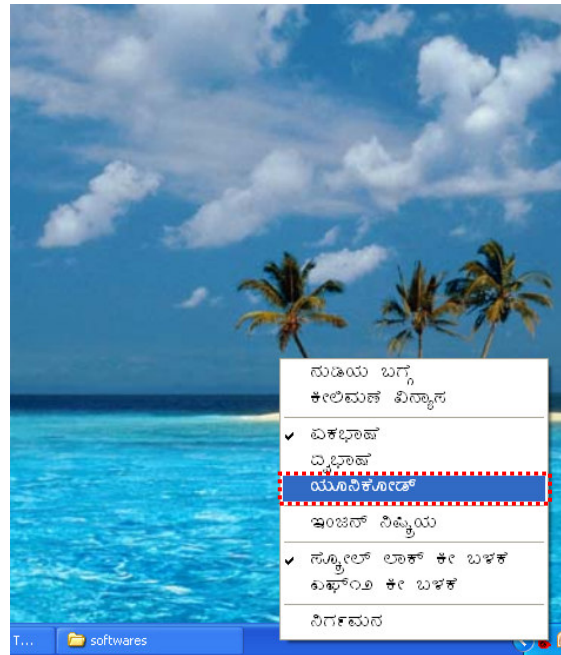

Fig. 10

After opening “Nudi Direct”, user has to select “Unicode” as highlighted in Fig. 10. Now system is ready and user will be able to enter details in Kannada more efficiently as highlighted in Fig. 11.

This screenshot shows the 'Registration Form' on the e-karmika web portal. The form is divided into two main sections: 'Postal Address' and a section for additional details. The 'Postal Address' section includes fields for Name Of Shop/CE (filled with 'kirantest'), Building No, Road, Nearby Land Mark, District (dropdown menu), PIN Code, Email ID (filled with 'spacekiran@gmail.com'), and Mobile Number (+91) (filled with '9742790999'). The additional details section includes fields for Building Name / Floor, Area, City / Town, Taluk (dropdown menu), Telephone Number (filled with 'eg. 080-12345678'), and Fax Number. A checkbox for 'Do you have Head Office' is present, with 'No' selected. On the right side, there is a section for 'ಬ್ಯಾಪಾರ ಸಂಸ್ಥೆಯ ಹೆಸರು' (Business Name) with a red dashed box around the input field, and a note: 'you can use letters numbers and spaces'. Below this are fields for 'ಕಟ್ಟಡದ ಹೆಸರು / ಅಂಕವು', 'ರಸ್ತೆ', 'ಪ್ರದೇಶ', 'ಹತ್ತಿರದ ಸುರುತು', and 'ನಗರ / ಪಟ್ಟಣ'. At the bottom, there are 'Submit' and 'Next' buttons.
